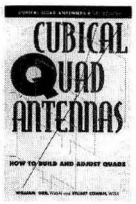
RADIO PUBLICATIONS HANDBOOKS



ALL ABOUT CUBICAL QUAD ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This well-known classic has been updated to include new Quad designs; new dimension charts for every type of Quad from 6 to 80 meters; additional gain figures; an analysis of Quad vs. Yagi; Mini and Monster Quad designs; Delta, Swiss, and Birdcage Quads; and on improved Tri-Gamma match to feed a triband Quad efficiently with one transmission line. Also covered are feed systems and tuning procedures for maximum gain and minimum SWR. Much of this data has never before been published.

ISBN 0-8230-8703-4. $11.95

BEAM ANTENNA HANDBOOK

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This popular new edition gives you the correct dimensions for 6, 10, 15, 20 and 40 meter beams; data on triband and compact beams; the truth about beam height; SWR curves for popular beams for 6 to 40 meters; and comparisons of T-match, Gamma match, and direct feed. It describes tests to confirm if your beam is working properly, tells how to save money by building your own beam and balun, and discusses test instruments and how to use them. This book is a "must" for the serious DX'er!

ISBN 0-8230-8704-2. $11.95

ALL ABOUT VHF AMATEUR RADIO

by William I. Orr W6SAI

This new handbook covers VHF propagation and DX, the VHF repeater and how it works for you, VHF moonbounce communication, and amateur satellite communication. It discusses vertical and horizontal mobile antennas, tells almost everything about coaxial cables, and describes VHF beam antennas you can build yourself. It also includes information on SWR measurements, VHF interference and how to suppress it, and even the proper care of Ni-cad batteries. This is a complete handbook of VHF radio for amateurs.

ISBN 0-8230-8705-0. $11.95.

THE RADIO AMATEUR ANTENNA HANDBOOK

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This clearly written handbook contains a wealth of information about amateur antennas, from beams to baluns, tuners, and towers. The exclusive "Truth Table" gives you the actual dB gain of 10 popular antenna types. Describes how to build multiband vertical and horizontal antennas, Quads, Delta Quads, Mini-Quads, a Monster Quad, DX "slopers," triband beams, and VHF Quagi and log periodic Yagi beams. Dimensions are given for all antennas in English and metric units. Covers radials, coaxial cable loss, "bargain" coax, baluns, SWR meters, wind loading, tower hazards, and the advantages and disadvantages of crank-up tilt-over towers.

ISBN 0-8230-8706-9. $11.95

SIMPLE, LOW-COST WIRE ANTENNAS FOR RADIO AMATEURS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Now—another great handbook joins the famous Cubical Quad and Beam Antenna Handbooks. Provides complete instructions for building tested wire antennas from 2 through 160 meters: horizontal, vertical, multiband traps, and beam antennas. Describes a 3-band Novice dipole with only one feedline; the "folded Marconi" antenna for 40, 80, or 160 meters; "invisible" antennas for difficult locations—hidden, disguised, and disappearing antennas (the Dick Tracy Special, the CIA Special). Covers antenna tuners and baluns, and gives clear explanations of radiation resistance, impedance, radials, ground systems, and lightning protection. This is a truly practical handbook.

ISBN 0-8230-8707-7. $11.95

THE TRUTH ABOUT CB ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Contains everything the CB'er needs to know to buy or build, install, and adjust efficient CB antennas for strong, reliable signals. A unique "Truth Table" shows the dB gain from 10 of the most popular CB antennas. The antenna is the key to clear, reliable communication but most CB antennas do not work near peak efficiency. Now, for the first time, this handbook gives clear informative instructions on antenna adjustment, exposes false claims about inferior antennas, and helps you make your antenna work. This handbook features exclusive and complete coverage of the "Monster Quad" beam, the "King" of CB antennas.

ISBN 0-8230-8708-5. $11.95

ALL ABOUT VERTICAL ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Properly designed, built, and installed vertical antennas do a fine job in small places. This clear, well-illustrated book covers the design, construction, installation, and operation of 52 vertical antennas: efficient Marconi antennas for 80 and 160 meters, multiband verticals, vertical loops, phased arrays, and shunt-fed towers. Also described are "radio" and electrical grounds, matching systems, tuners, loading coils, and TVI, plus the precautions necessary to protect yourself, your home, and your equipment from lightning damage... and much more! It's the most practical and authoritative vertical handbook in print.

THIRD-PARTY TRAFFIC

The U.S. Federal Communications Commission defines third-party traffic [Part 97.3 (a) (38)] as: "a message from the control operator (first party) of an amateur station to another amateur station control operator (second party) on behalf of another person (third party)." U.S. amateurs are only permitted to handle such third-party traffic with countries having third-party agreements with the United States.

The following is a current list of these countries:

RECIPROCAL OPERATING AGREEMENTS

The United States has negotiated reciprocal operating agreements with many other countries. Amateurs may operate within the territory of these countries according to the terms of the agreement after first obtaining a permit from the host country. The sole exception is Canada: amateurs with valid U.S. or Canadian licenses may operate within the other country's territory without obtaining a permit. They must, of course, abide by all the terms of the reciprocal operating agreement.

The following is a current list of countries having reciprocal operating agreements with the United States:

SPECIAL LISTINGS

A **Special Listing in the *Callbook*** is printed in boldface type to ensure your recognition in the crowd and make your listing easier to locate. This service includes special handling to give you just the wording you want. Would you like to include a nickname or a non-controversial slogan? Do you have more than one mailing address, perhaps one in the summer and another in the winter? A *Callbook* Special Listing can provide these services and more for an entire year at nominal cost. The basic Special Listing is 3 lines or fewer. Additional lines are available up to a total of 9 lines. Please note there is a maximum of 44 characters and spaces per line. The publisher reserves the right to refuse any copy not in keeping with the *Callbook's* standards.

Copy deadline is September 15, 1995 for the 1996 editions of the *Callbooks.*
Item # RC2496

$15.00 Basic 3-line listing, per year.
$5.00 Each additional line (maximum 9 lines)

STANDARD TIME THROUGHOUT THE WORLD

The standard time system is based on the theoretical division of the surface of the globe into 24 zones, each of 15° of longitude. The initial zone is the one which has as its central meridian the Greenwich Meridian and with the meridians 7° 30' E. and 7° 30' W. as its eastern and western limits. Time in this zone is called Universal Coordinated Time, or UTC. Places to the east of Greenwich are ahead of UTC, while places to the west are behind UTC. Not all countries follow the International Time Zone System, but will use the time of some principal city as a standard or will have no standard time at all.

Reference - "Standard Time Chart of the World" No. 5192, published by the U.S. Navy Hydrographic Office, Washington D.C.

The theoretical system described is applied, in a strict sense, only in oceanic regions. On land or on groups of islands the system is applied with certain local deviations made necessary by frontiers or to permit an entire island group to have the same time zone. The time used in each country, whether it is the time of the corresponding zone or a modified time, is fixed by law and is called legal time, or more generally, standard time.

Another deviation from this theoretical system is that certain countries, for economic reasons, modify their legal time for part of the year (especially in summer) by advancing it an hour or another fraction of time. Where such deviations are maintained on a year-around basis, the time kept is considered to be standard time.

"PROOF OF LICENSING" CERTIFICATE

Membership in many clubs and associations is only open to amateurs licensed for at least a specified number of years. If your original license has been lost, the *Callbook* may be able to provide the required proof of licensing from its extensive library of historical records. A notarized certificate attesting to the issue in which your call first appeared is accepted by most organizations as proof you were licensed when that issue was published. This beautiful certificate makes a great souvenir or gift.

LEARN THE SECRETS!

Let these review excerpts tell you about W9KNI's book, available now in a new second edition:

- **QST:** ... a must for every ham who wants to work DX. Easy to read and understand ... You get the feeling of being in his shack ... (as) he shares his DX'ing methods ... devoted mostly to operating techniques ... that can be described as a DXer's secrets ... location and ... good advice on sound engineering, appropriate hardware and proper installation. The author has ... a healthy philosophy for DX in general and the DX'er in particular ... (and) respect for engineering laws, competition rules and operating ethics.

- **THE DX BULLETIN:** Spills the beans about operating techniques ... (that are) ... dark mysteries to most operators. His easy, conversational style never condescends to the reader (and) ... leaves other tutorials behind. Sections on choosing a station and selecting antennas are particularly useful ... pulls everything together ... a timeless work.

- **HAM RADIO MAGAZINE:** There hasn't been a really great DX book-until now. W9KNI has created a first class treatise on the art of DX'ing that is every bit as entertaining as it is educational ... could be the best investment a DX'er could make.

- **73 MAGAZINE:** (Puts the reader) ... right in the middle of the action ... Written by an experienced DX chaser, yet clear and simple enough for the beginner, the book tantalizes and teaches at the same time ... to be savored at leisure.

- **HUGHES-FULLERTON ARC BULLETIN:** ... gives one the notion that DX'ing is not a rich man's game, but an art form that can be mastered and enjoyed regardless of the amount of hardware in the shack and on the tower ... A course in DX technique which you will want to refer to again and again.

- **WESTLINK REPORT:** **The Complete DX'er** by Bob Locher, W9KNI is simply the best book of its type ever written. You will find (it) almost spellbinding ... it's worth every penny!

We couldn't say it better-**The Complete DX'er**, now in a new second edition, belongs in every shack. For prompt shipment of your copy, send a check or money order for $15.00 which includes shipping within the United States, or $16.00 in U.S. funds which includes shipping to countries outside the U.S.

RADIO PUBLICATIONS HANDBOOKS

ALL ABOUT CUBICAL QUAD ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This well-known classic has been updated to include new Quad designs; new dimension charts for every type of Quad from 6 to 80 meters; additional gain figures; an analysis of Quad vs. Yagi; Mini and Monster Quad designs; Delta, Swiss, and Birdcage Quads; and on improved Tri-Gamma match to feed a triband Quad efficiently with one transmission line. Also covered are feed systems and tuning procedures for maximum gain and minimum SWR. Much of this data has never before been published.

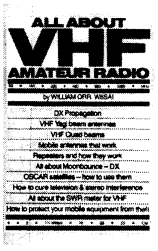
ISBN 0-8230-8703-4. $11.95

BEAM ANTENNA HANDBOOK

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This popular new edition gives you the correct dimensions for 6, 10, 15, 20 and 40 meter beams; data on triband and compact beams; the truth about beam height; SWR curves for popular beams for 6 to 40 meters; and comparisons of T-match, Gamma match, and direct feed. It describes tests to confirm if your beam is working properly, tells how to save money by building your own beam and balun, and discusses test instruments and how to use them. This book is a "must" for the serious DX'er!

ISBN 0-8230-8704-2. $11.95



ALL ABOUT VHF AMATEUR RADIO

by William I. Orr W6SAI

This new handbook covers VHF propagation and DX, the VHF repeater and how it works for you, VHF moonbounce communication, and amateur satellite communication. It discusses vertical and horizontal mobile antennas, tells almost everything about coaxial cables, and describes VHF beam antennas you can build yourself. It also includes information on SWR measurements, VHF interference and how to suppress it, and even the proper care of Ni-cad batteries. This is a complete handbook of VHF radio for amateurs.

ISBN 0-8230-8705-0. $11.95.

THE RADIO AMATEUR ANTENNA HANDBOOK

by William I. Orr W6SAI and Stuart D. Cowan W2LX

This clearly written handbook contains a wealth of information about amateur antennas, from beams to baluns, tuners, and towers. The exclusive "Truth Table" gives you the actual dB gain of 10 popular antenna types. Describes how to build multiband vertical and horizontal antennas, Quads, Delta Quads, Mini-Quads, a Monster Quad, DX "slopers," triband beams, and VHF Quagi and log periodic Yagi beams. Dimensions are given for all antennas in English and metric units. Covers radials, coaxial cable loss, "bargain" coax, baluns, SWR meters, wind loading, tower hazards, and the advantages and disadvantages of crank-up tilt-over towers.

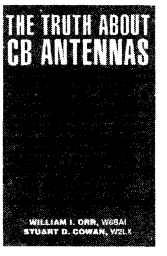
ISBN 0-8230-8706-9. $11.95

SIMPLE, LOW-COST WIRE ANTENNAS FOR RADIO AMATEURS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Now—another great handbook joins the famous Cubical Quad and Beam Antenna Handbooks. Provides complete instructions for building tested wire antennas from 2 through 160 meters: horizontal, vertical, multiband traps, and beam antennas. Describes a 3-band Novice dipole with only one feedline; the "folded Marconi" antenna for 40, 80, or 160 meters; "invisible" antennas for difficult locations—hidden, disguised, and disappearing antennas (the Dick Tracy Special, the CIA Special). Covers antenna tuners and baluns, and gives clear explanations of radiation resistance, impedance, radials, ground systems, and lightning protection. This is a truly practical handbook.

ISBN 0-8230-8707-7. $11.95

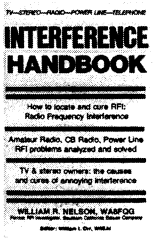


THE TRUTH ABOUT CB ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Contains everything the CB'er needs to know to buy or build, install, and adjust efficient CB antennas for strong, reliable signals. A unique "Truth Table" shows the dB gain from 10 of the most popular CB antennas. The antenna is the key to clear, reliable communication but most CB antennas do not work near peak efficiency. Now, for the first time, this handbook gives clear informative instructions on antenna adjustment, exposes false claims about inferior antennas, and helps you make your antenna work. This handbook features exclusive and complete coverage of the "Monster Quad" beam, the "King" of CB antennas.

ISBN 0-8230-8708-5. $11.95



INTERFERENCE HANDBOOK

by William R. Nelson WA6FQG, edited by William I. Orr W6SAI

This timely book covers every radio frequency interference (RFI) problem, with solutions based on years of practical experience. Covers amateur radio, CB radio, mobile, telephone, power line, CATV, and computer problems with proven solutions. This useful handbook contains case histories and valuable tips for stereo and TV owners to cure interference.

ISBN 0-8230-8709-3. $11.95

ALL ABOUT VERTICAL ANTENNAS

by William I. Orr W6SAI and Stuart D. Cowan W2LX

Properly designed, built, and installed vertical antennas do a fine job in small places. This clear, well-illustrated book covers the design, construction, installation, and operation of 52 vertical antennas: efficient Marconi antennas for 80 and 160 meters, multiband verticals, vertical loops, phased arrays, and shunt-fed towers. Also described are "radio" and electrical grounds, matching systems, tuners, loading coils, and TVI, plus the precautions necessary to protect yourself, your home, and your equipment from lightning damage... and much more! It's the most practical and authoritative vertical handbook in print.

THIRD-PARTY TRAFFIC

The U.S. Federal Communications Commission defines third-party traffic [Part 97.3 (a) (38)] as: "a message from the control operator (first party) of an amateur station to another amateur station control operator (second party) on behalf of another person (third party)." U.S. amateurs are only permitted to handle such third-party traffic with countries having third-party agreements with the United States.

The following is a current list of these countries:

RECIPROCAL OPERATING AGREEMENTS

The United States has negotiated reciprocal operating agreements with many other countries. Amateurs may operate within the territory of these countries according to the terms of the agreement after first obtaining a permit from the host country. The sole exception is Canada: amateurs with valid U.S. or Canadian licenses may operate within the other country's territory without obtaining a permit. They must, of course, abide by all the terms of the reciprocal operating agreement.

The following is a current list of countries having reciprocal operating agreements with the United States:

SPECIAL LISTINGS

A **Special Listing in the *Callbook*** is printed in boldface type to ensure your recognition in the crowd and make your listing easier to locate. This service includes special handling to give you just the wording you want. Would you like to include a nickname or a non-controversial slogan? Do you have more than one mailing address, perhaps one in the summer and another in the winter? A *Callbook* Special Listing can provide these services and more for an entire year at nominal cost. The basic Special Listing is 3 lines or fewer. Additional lines are available up to a total of 9 lines. Please note there is a maximum of 44 characters and spaces per line. The publisher reserves the right to refuse any copy not in keeping with the *Callbook's* standards.

Copy deadline is September 15, 1995 for the 1996 editions of the *Callbooks.*
Item # RC2496

$15.00 Basic 3-line listing, per year.
$5.00 Each additional line (maximum 9 lines)

STANDARD TIME THROUGHOUT THE WORLD

The standard time system is based on the theoretical division of the surface of the globe into 24 zones, each of 15° of longitude. The initial zone is the one which has as its central meridian the Greenwich Meridian and with the meridians 7° 30' E. and 7° 30' W. as its eastern and western limits. Time in this zone is called Universal Coordinated Time, or UTC. Places to the east of Greenwich are ahead of UTC, while places to the west are behind UTC. Not all countries follow the International Time Zone System, but will use the time of some principal city as a standard or will have no standard time at all.

Reference - "Standard Time Chart of the World" No. 5192, published by the U.S. Navy Hydrographic Office, Washington D.C.

The theoretical system described is applied, in a strict sense, only in oceanic regions. On land or on groups of islands the system is applied with certain local deviations made necessary by frontiers or to permit an entire island group to have the same time zone. The time used in each country, whether it is the time of the corresponding zone or a modified time, is fixed by law and is called legal time, or more generally, standard time.

Another deviation from this theoretical system is that certain countries, for economic reasons, modify their legal time for part of the year (especially in summer) by advancing it an hour or another fraction of time. Where such deviations are maintained on a year-around basis, the time kept is considered to be standard time.

"PROOF OF LICENSING" CERTIFICATE

Membership in many clubs and associations is only open to amateurs licensed for at least a specified number of years. If your original license has been lost, the *Callbook* may be able to provide the required proof of licensing from its extensive library of historical records. A notarized certificate attesting to the issue in which your call first appeared is accepted by most organizations as proof you were licensed when that issue was published. This beautiful certificate makes a great souvenir or gift.

LEARN THE SECRETS!

Let these review excerpts tell you about W9KNI's book, available now in a new second edition:

- **QST:** ... a must for every ham who wants to work DX. Easy to read and understand ... You get the feeling of being in his shack ... (as) he shares his DX'ing methods ... devoted mostly to operating techniques ... that can be described as a DXer's secrets ... location and ... good advice on sound engineering, appropriate hardware and proper installation. The author has ... a healthy philosophy for DX in general and the DX'er in particular ... (and) respect for engineering laws, competition rules and operating ethics.

- **THE DX BULLETIN:** Spills the beans about operating techniques ... (that are) ... dark mysteries to most operators. His easy, conversational style never condescends to the reader (and) ... leaves other tutorials behind. Sections on choosing a station and selecting antennas are particularly useful ... pulls everything together ... a timeless work.

- **HAM RADIO MAGAZINE:** There hasn't been a really great DX book-until now. W9KNI has created a first class treatise on the art of DX'ing that is every bit as entertaining as it is educational ... could be the best investment a DX'er could make.

- **73 MAGAZINE:** (Puts the reader) ... right in the middle of the action ... Written by an experienced DX chaser, yet clear and simple enough for the beginner, the book tantalizes and teaches at the same time ... to be savored at leisure.

- **HUGHES-FULLERTON ARC BULLETIN:** ... gives one the notion that DX'ing is not a rich man's game, but an art form that can be mastered and enjoyed regardless of the amount of hardware in the shack and on the tower ... A course in DX technique which you will want to refer to again and again.

- **WESTLINK REPORT:** **The Complete DX'er** by Bob Locher, W9KNI is simply the best book of its type ever written. You will find (it) almost spellbinding ... it's worth every penny!

We couldn't say it better-**The Complete DX'er**, now in a new second edition, belongs in every shack. For prompt shipment of your copy, send a check or money order for $15.00 which includes shipping within the United States, or $16.00 in U.S. funds which includes shipping to countries outside the U.S.
